PROFESSIONAL EXPERIENCE

Rocket Mortgage

Nov. 2021 – Present

Senior Data Scientist

- Developed and deployed an XGBoost propensity model that matched clients to loan officers, increasing conversion rates by 10%.
- Built and maintained 100+ features in AWS Feature Store, supporting both model training pipelines and low-latency real-time inference.
- Led the design of the team's machine learning architecture, establishing customer segmentation, model routing, and deployment standards that supported multiple production propensity models.
- Developed a low-latency model scoring service that generated propensity predictions during client interactions, enabling immediate sales prioritization.
- Created a Random Forest classification model to estimate long-term client retention risk, enabling proactive mortgage servicing rights sales and portfolio optimization.
- Designed and delivered Python and machine learning training for 50+ analysts, increasing adoption of advanced analytics techniques across the organization.

University of Michigan (Part Time)

Sep. 2025 – Present

Course Manager - Masters Data Science Program

- Guest lecturer for the Big Data Analytics course within the Master of Science in Information program.
- Led office hours and review sessions for graduate students in the Master of Applied Data Science program.

Rocket Mortgage

Aug. 2017 – Nov. 2021

Senior Data Analyst

- Launched AB tests to optimize phone contact strategy, reducing opt outs by 5% while maintaining production.
- Developed Tableau and Power BI dashboards used across multiple business units to support operational and strategic decision-making.
- Developed and maintained hundreds of production SQL queries and stored procedures supporting enterprise reporting and analytics.

EDUCATION

UNIVERSITY OF MICHIGAN

Ann Arbor, MI

Masters, Data Science

Graduated May 2025

- Awarded [1st Place in cohort capstone competition](#) for developing an LLM-based brand sentiment analysis platform using Reddit data.

UNIVERSITY OF MICHIGAN

Ann Arbor, MI

BA in Economics; Minors in Math and Religion

Graduated May 2017

TOP PROJECTS

- **Automated Hockey Analytics Platform** (Python, AWS, GitHub Actions) – Built an end-to-end system that collects, processes, and [publishes adult hockey league statistics](#).
- **Low-Latency Home Price Prediction Website** (AWS, Docker, S3, Lambda) – Real-time [home valuation website](#).

SKILLS and AWARDS

- **Skills:** Python, SQL, GitHub, AWS, SageMaker, Feature Store, MLFlow, Redshift, Athena, LangChain, Pandas, Neural Networks, Power BI, Tableau, Causal Inference, Time Series Modeling, Data Visualization, Statistical Tests
- **Awards:** Rocket Mortgage - *Best Breakthrough Performance (2018)*, Rocket Mortgage - *Innovators & Disruptors Award (2023, 2024)*, University of Michigan MADS Capstone Competition – *1st Place (2025)*
